Arkad

Arkad is a highly-adaptable 3D printed insole system able to support a broad range of patients. Offering variability of density in each region of the insole allows the orthosis to be tuned to the needs of the patient**. Please choose some base densities for the insole and additional densities for each region or element as required.**

Rearfoot Density: 1.0 - Very Soft (approx 30 Shore)
Midfoot Density: 1.0 - Very Soft (approx 30 Shore)
Forefoot Density: 1.0 - Very Soft (approx 30 Shore)

How many pairs do you require:
